

## **STATISTICS & GEOMETRY**

MR. SALEM

[ksalem@lvusd.org](mailto:ksalem@lvusd.org)

*This course will be online for the 2020-2021 school year. It requires a high degree of time management skills as well as a moderate level of online experience. In addition to the live Zoom minutes, you need to budget at least five or more hours per week to studying for this course, watching video lessons and completing homework assignments in order to succeed in this class. If you have any questions or concerns, email me.*

*Please Note: In order to be successful, you need to actively participate each week in class. That is, complete assignments, quizzes, respond to questions, and turn in work. Failure to do so may cause you to quickly fall behind. It would be beneficial if you develop a routine.*

*All grades are posted on Aeries. Grades will be updated frequently. Please email me if you have questions or concerns about your grades. I would like students to have the responsibility of monitoring their own grade throughout the course. By monitoring your grade, you will better able to see the correlation between your work and the grade you are receiving.*

### **COURSE POINT BREAKDOWN**

- **ASSESSMENTS (75-80%)**
  - **TESTS** - Students will be given at least one weeks notice before each test. There are no retakes on tests. Make-up tests are given for excused absences only. All chapter tests will be worth 100 points and the final will be worth 200 points.
  - **QUIZZES** - Quizzes are sometimes given without notice. Quizzes are an opportunity to expose students' weaknesses before tests. They are administered in order to assist in the learning process.
- **HOMEWORK/CLASSWORK (20-25%)**
  - Homework is posted online at [www.mathwithsalem.weebly.com](http://www.mathwithsalem.weebly.com) and is updated periodically. Homework will be assigned daily.

### **POLICIES**

- Please refer to math department policies regarding Test makeups and pre-requisite courses.
- If students are absent the day before a test (review day) or the review and test day, he or she will be expected to take the test on the day of his or her return.

### **ACADEMIC DISHONESTY**

- Academic Dishonesty is a deliberate attempt to disrupt the learning process by misrepresenting another's work as one's own. Dishonesty during tests or classwork includes unauthorized communicating; copying materials or allowing another student to copy; using prohibited notes or devices; obtaining prior knowledge of test content; and/or removing or distributing all or part of any test. Copying another person's assignment; providing homework/classwork for another student to replicate; plagiarizing or submitting a paper or project which is not one's own work. Submitting falsified information for grading purposes are also examples of dishonesty.
